EDUCATION

B.Tech | Year 2018-21
CCS University (U.P.)
Percent: **82%**

Diploma In Engineering | Year 2015-18
Govt Polytechnic Saharanpur (U.P.)
Percent: **79**%

SKILLS & SOFTWARE

- NodeJS & Express
- JavaScript
- ReactJS
- HTML/CSS/BootStrap
- Redux
- AWS
- MongoDB & DynamoDB
- Git
- GitHub & BitBucket
- Unit Testing with Jest
- Postman & SoapUi
- Cloud9 & VSCode IDE
- Elastic Search

ACHIEVEMENTS

- Passed TCS digital exam of MERN.
- Received two times On the spot award Aug 2022 and Jan 2023.
- Awarded with Applause Award in Aug 2023.
- Successfully delivered multiple API's to PROD.

INTEREST

- Listening Music
- Enthusiastic Tech learner

CAREER OBJECTIVE

Self-motivated IT professional with knowledge and proficiency in ReactJS, NodeJS and AWS. As well as highly potent skills and ability in encoding bug-free and efficient code, seeks the position of MERN Web Developer

PROFESSIONAL EXPERIENCE

System Engineer (API Development):
-Tata Consultancy Services   *12/2022 - PRESENT*

B2C API Migration with NodeJs runtime:

- Worked on migration of on premise services to AWS cloud using NodeJs for one of largest Canadian Bank.
- Migrated and optimized multiple APIs REST/SOAP APIs integrating AWS services like Lambda, API Gateway, DynamoDB, NLB, CloudFormation, IAM and monitoring tools ensuring end-to-end functionality, security, scalability and made successful production deployment, collaborating with the cloud engineering team on call support 24X7 and resolving production issues.
- Worked closely with the backend team to connect REST APIs to on premise backend services for smooth data flow.
- Collaborated with the QA team to validate and complete end-to-end API functionality.
- Created clear requirements documents (SFS page) to explain service details and flow.
- Followed a performance checklist to meet and exceed industry benchmarks for code readiness, efficiency and reliability.

A6 Modernization using ReactJs: *11/2021 - 11/2022*

- It's an Enterprise project made while working for TCS for Scotiabank for onboarding their customers
- Responsible for development of screen and validation logics.
- Responsible for testing UI and micro services using Jest.
- Integrated APIs with front-end using fetch
- Used Redux for state management of a page
- Covered end-to-end unit testing with jest and enzyme framework making above 80% code coverage
